University

FEEDBACK

CLIENT

Didn't have anything negative to say about the project — thought everything was good and easy to use, even for kids. Said she could envision her own kids using the website and not having an issue.

CLIENT USE OF PROJECT

Didn't find any issues — pretended to be a regular user and it seemed to go smoothly. Said it seemed easy to use and liked the new features — good quality of life and security changes.

MENTOR

Thought everything looked good, same as she always says, along with some final goodbyes and invitations to add her on LinkedIn.

BENEFIT TO THE CLIENT

STAYING CONNECTED

Before our website, everything the client did was on paper. Now with our website, she can bring her immersive learning project into the modern era, encouraging kids all around our community to get moving (whether their name is Henry or not).

DELETE CATEGORIES

Admin panel

Added the ability to delete categories from the admin panel, since you could delete everything else
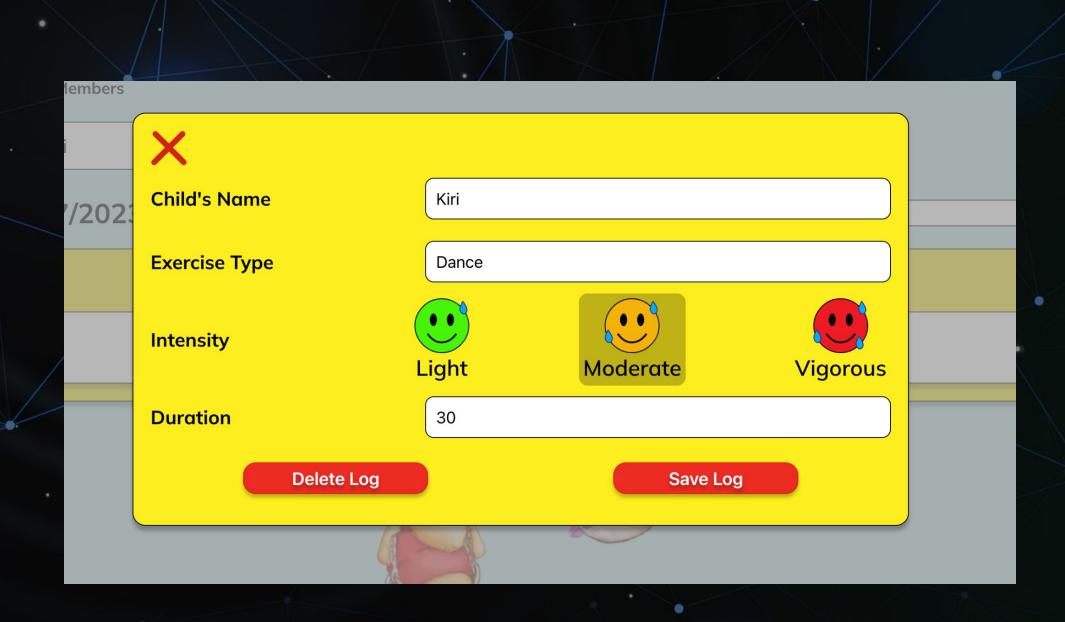

# EDIT LOGS

In case you make a typo

A whole pop-up menu to edit various aspects of exercise logs after they're created, including attributing them to a different family member, changing the type, intensity, and duration, all of which will update the associated attributes, and create a new family member if the new name doesn't have one.
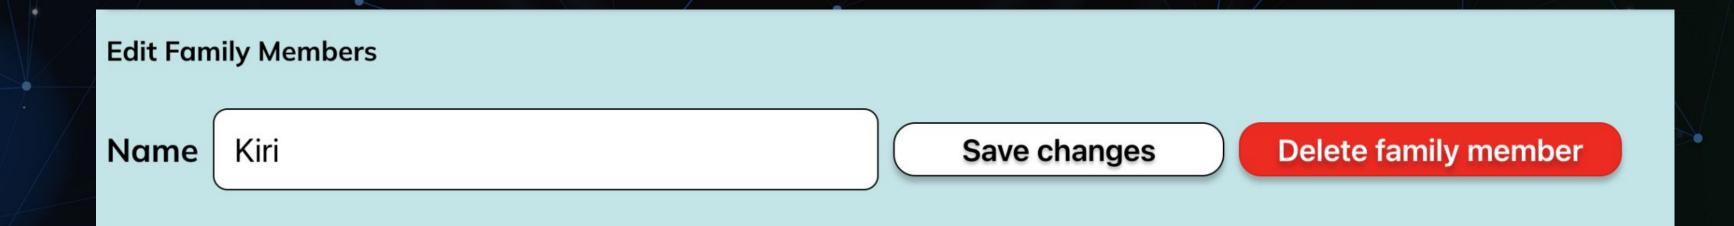

ADMIN PASSWORD

An extra layer of security

On top of not having the admin panel accessible via a button on the website, there's now an extra layer of security in the form of a password so that not everyone can edit the contents of the website.

FAMILY MEMBER MANAGER

For typos and name changes alike

Allows users to edit family members' names while keeping all their exercise logs with them, as well as delete family members, which also deletes all their exercise logs.

Edit Family Members

Name | Kiri | Save changes | Delete family member

WE'RE DONE!!!!
